## 2007 Survey Reports

This is one of four separate documents that present aspects of the 2007 Survey of foster parents and relative caregivers in Washington State. Below is a brief description of the contents of each report:

- **Benchmark Report 07-054**

This report presents an introduction to the purpose of the survey, provides an overview of the survey methods, and describes the calculation of eight specific Braam Panel benchmarks. The report presents the benchmark results for all licensed and unlicensed caregivers and for the six DSHS regions.

- **Appendix to the Benchmark Report**

The appendix to the benchmark report includes the detailed data tables and survey results that were used in the calculation of the eight specific benchmarks.

- **SESRC Data Report 07-048**

This report is a compilation of the survey methods and survey results and includes a copy of the telephone interview questionnaire, the letter mailed to foster parents and relative caregivers, and other survey materials. This report includes the final sample disposition, and the results for every question in the survey for licensed and unlicensed caregivers.

- **Appendix to the SESRC Data Report 07-048**

The appendix to the survey data report includes a frequency tabulation of all survey questions for all survey respondents. There are also separate sections for frequency tabulations of all survey questions for licensed caregivers, and for unlicensed caregivers.
