2009 Survey Reports

This is one of four separate documents that present aspects of the 2009 Survey of foster parents and relative caregivers in Washington State. Below is a brief description of the contents of each report:

- **Braam Outcomes Report 09-044**

This report presents an introduction to the purpose of the survey, provides an overview of the survey methods, and describes the calculation of nine specific Braam Panel outcomes. The report presents the results for all licensed and unlicensed caregivers and for each of the six DSHS regions.

- **Appendix to the Braam Outcomes Report**

The appendix to the Braam outcomes report includes the detailed data tables and survey results that were used in the calculation of the nine specific Braam Panel outcomes.

- **SESRC Data Report 09-040**

This report is a compilation of the survey methods and survey results and includes a copy of the telephone interview questionnaire, the letter mailed to foster parents and relative caregivers, and other survey materials. This report includes the final sample disposition, and the results for every question in the survey for licensed and unlicensed caregivers.

- **Appendix to the SESRC Data Report**

The appendix to the survey data report includes a frequency tabulation of all survey questions for all survey respondents. There are also separate sections for frequency tabulations of all survey questions for licensed caregivers, and for unlicensed caregivers.

Braam Outcomes Measurement

The procedure for obtaining an outcome measurement has five basic steps:

- (1) Identify the relevant survey questions for each outcome.
- (2) Code all responses to each question to be included in a outcome, as being:
 - In compliance
 - Out of compliance
 - Not applicable
- (3) Obtain the frequency of each code for every question in the outcome, and calculate averages for those questions to be combined.
- (4) Calculate the outcome for each question according to the following formula:

$$\frac{\# \text{ In compliance}}{\# \text{ In compliance} + \# \text{ Out of compliance}}$$

- (5) Calculate the outcome for subgroups and regions:
 - Licensed foster parents
 - Unlicensed Relative caregivers
 - Six regions
